¹Anker is the No.1. mobile charging brand in the world in terms of the retail sales value in (3 consecutive years of) 2020, 2021, and 2022.
Data source: Euromonitor International (Shanghai) Co., Ltd., measured in terms of retail value sales in 2020, 2021, and 2022, based on research conducted in October 2023. Mobile charging brands are defined as brands if more than 75% of their retail sales are contributed by mobile phone charging products. Mobile phone charging products include chargers, wireless chargers, power banks, and charging cables, and these accessories can also be used for other consumer electronics devices.

²Data source: Euromonitor International (Shanghai) Co., Ltd., measured in terms of brands' retail sales value (USD million) globally in 2024. Plug-and-play balcony solar battery storage includes both all-in-one types with built-in micro inverters and standalone types connected to external inverters. Both types enable users to install and use immediately at home. Research completed in February 2025.

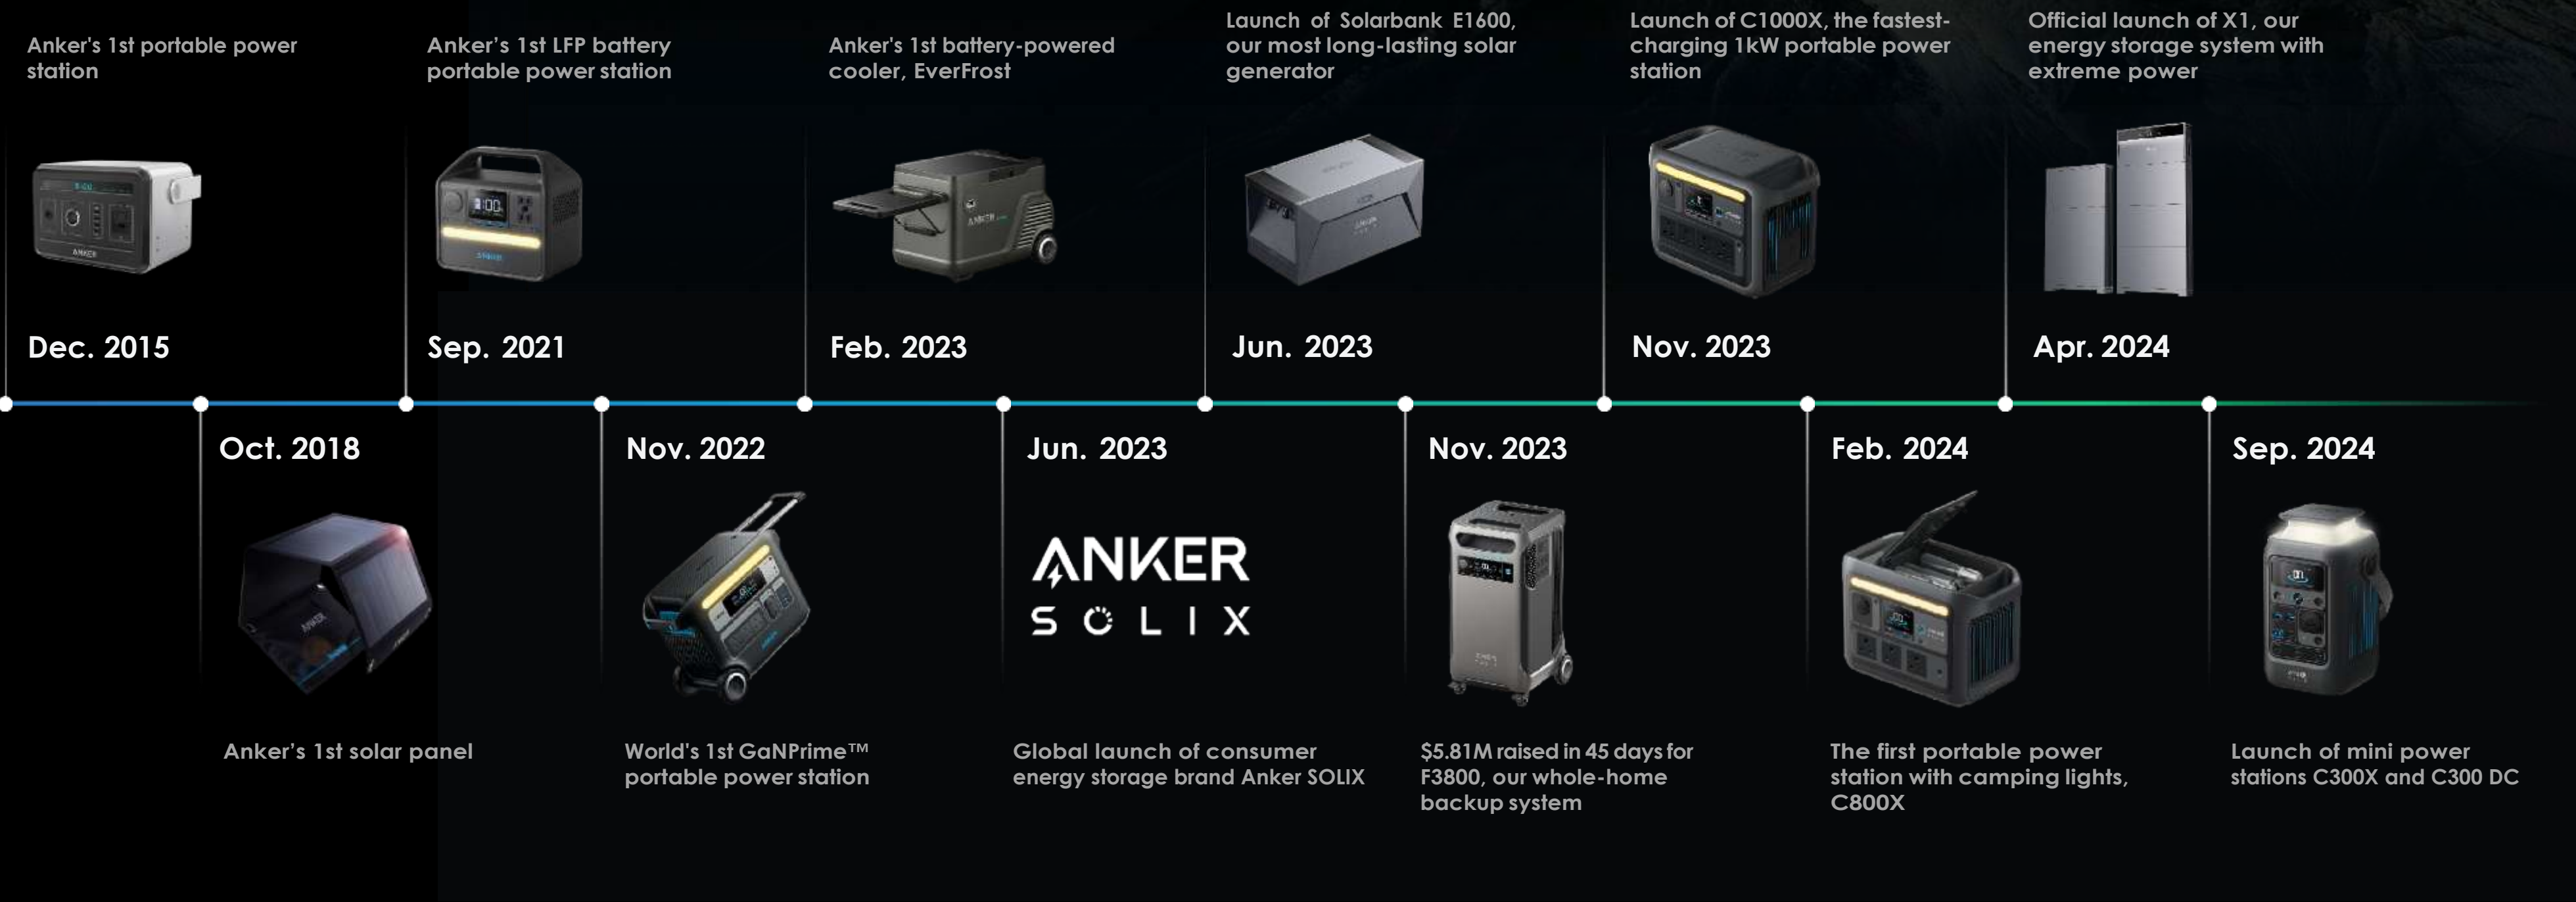

Our Purpose Empowers the World

Our mission is to enable everyone
everywhere with energy independence,
to power on a sustainable future together.

Empowering Smarter Lives

Anker’s unprecedented growth shows no signs of slowing as the company expands its reach in consumer electronics. Driven by a mission to empower people with reliable, sophisticated technology, Anker has dominated the industries of mobile charging, premium audio, home security—and now portable power stations.

Industry-Leading Charging and Battery Technologies

GaNPrime™

Anker is the pioneer of developing GaN chargers, achieving 95% efficiency, smaller size, lighter weight, and USB-C Power Delivery.

SurgePad™

Anker's Surgepad™ automatically turns on when the total output exceeds the rated output, allowing the power station to deliver rated power to high-wattage devices.

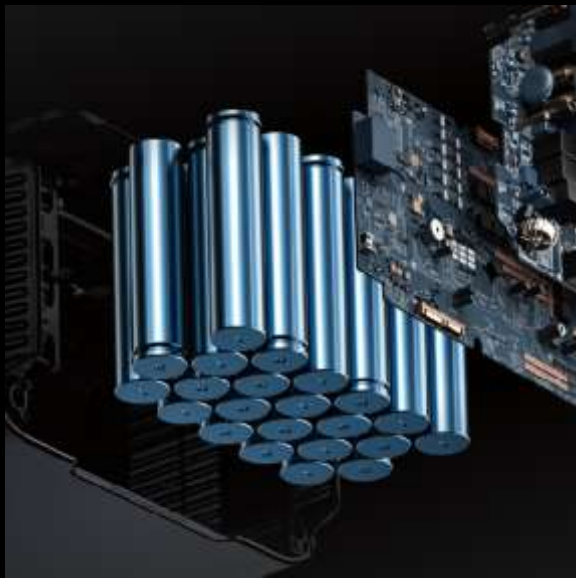

HYPER FLASH™

Anker's HyperFlash features industry-leading bidirectional inverter technology, allowing direct AC charger use for faster device charging without an adapter.

EasyTow™

Anker's EasyTow™ handle features a durable aluminum alloy tie rod design, which can extend and contract over 30,000 times without any maintenance.

InfiniPower™

Anker's proprietary technology InfiniPower™ offers unprecedented lifespan, safety, and reliability, even with 10 years of everyday use.

TotalGuard™

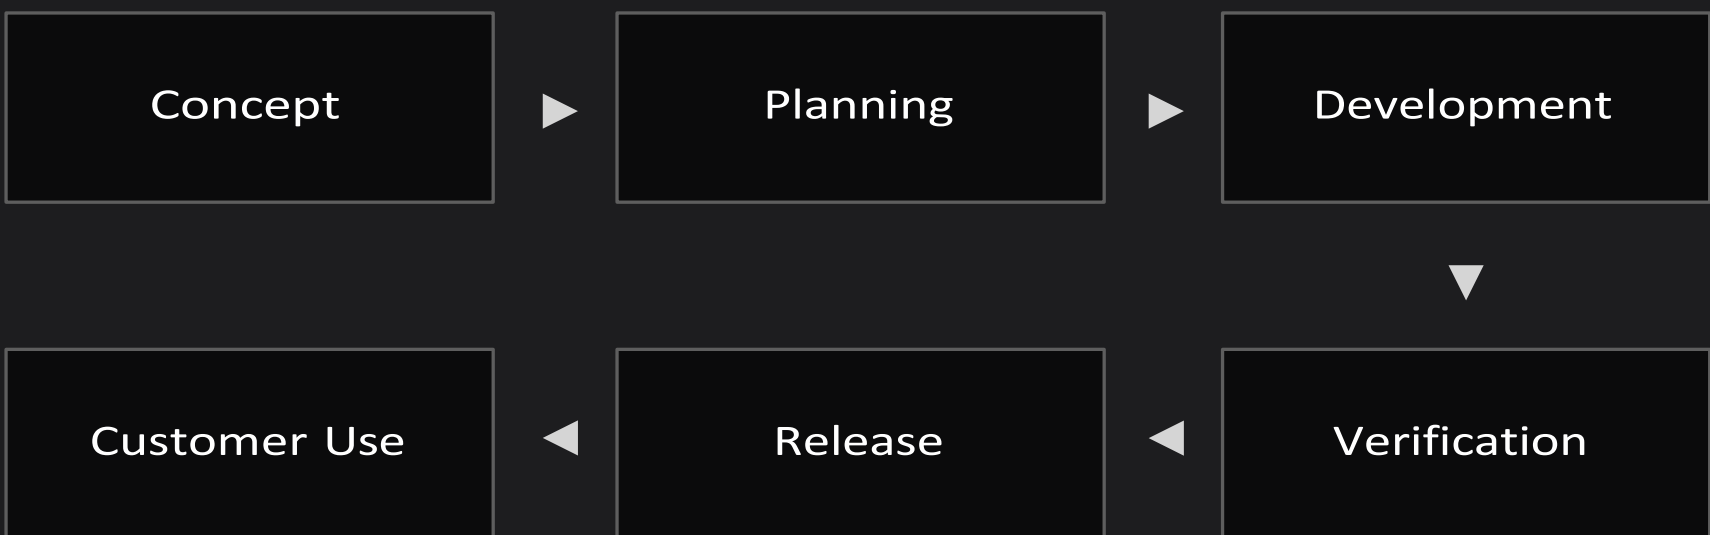

Anker's TotalGuard™ features a drop-resistant design and materials that meet industry testing standards.

Customer Praise, Rave Reviews

★★★★★

Outstanding Performance

Tom D.

Purchased to supplement a Solix F3800 installation for office/kitchen/misc charging needs.

★★★★★

Love the smaller size

Sharon W.

Love it more than my F1200 because of it's lighter size.

★★★★★

An excellent portable generator

Chris W.

I've been using this daily for a few weeks and really enjoy it. It has done everything it says it will do and the build quality is solid

★★★★★

Powering accessories in mobile book store

George S.

I purchased this during Black Friday to power small accessories in our mobile book store. It's currently powering a neon light, fan, strip lights, speaker and every now and then charging a phone. It's doing the job tremendously.

★★★★★

Amazing Power Bank!

Sherri

C1000 powered a 6.5" TV, DVR, modem, router, 2 table lamps, and kept two iPad Pros running the entire time. When the outage was over, we still had only used 67% of the battery. It kept running for 6.5 hours like there was not ouage, and it was whisper quiet.

★★★★★

Great power station

Kenneth S,

Does what it's supposed to do. Recharges quickly, powerful. More than enough charging ports.

The Tech That Powers Rapid Charging

HyperFlash™ Technology

Built-in bidirectional inverter converts AC to DC power without an adapter for high conversion efficiency.

Innovative Charging

At low-voltage, the system switches from constant current to constant power for more current and faster charging.

Advanced Batteries

Our batteries have a higher energy density, so you can charge at 1,500W.

Smart Temperature Control

The system monitors five temperature zones with precision, ensuring reliable power at all times.

Small

The Feats Behind the Light Weight

Structure Optimization

A smaller gap between cells and brackets has lowered weight by 6 oz.

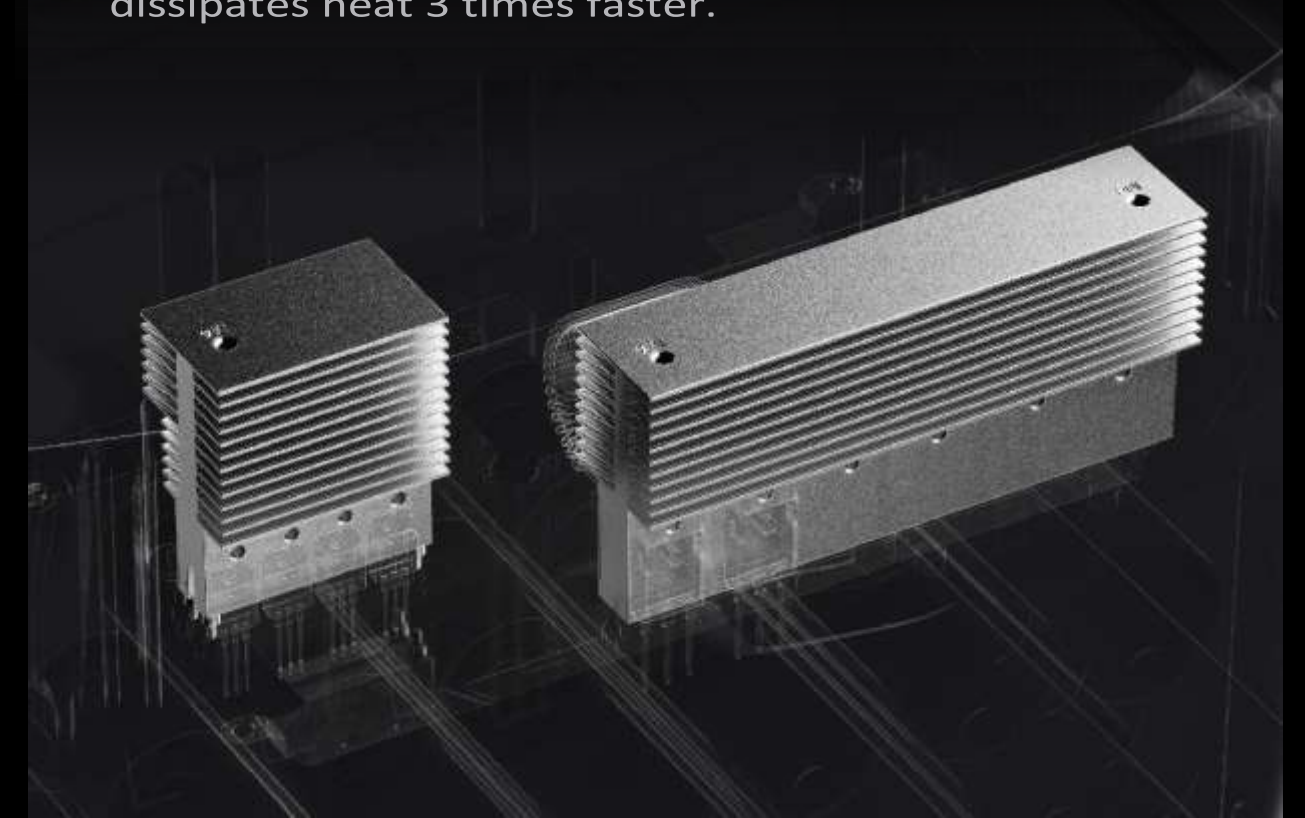

Upgraded Materials

The busbar is built out of pure aluminum, lowering weight by 1.4 oz.

Thermal Innovations

Instead of fans, a metal-ceramic composite dissipates heat 3 times faster.
